About Digitalis

Digitalis Education Solutions, Inc.'s innovations are grounded upon a unique blend of technical expertise and real-world astronomy education experience. Our goal is to offer the most cost effective, easy to use, and practical astronomy education tools.

Our breakthrough Digitalium® Alpha model, introduced in 2003, was the first truly affordable digital planetarium system. No other systems come close to matching our unique combination of usability, features, projection quality, product support, and affordable pricing.

Live, Intuitive, and Untethered

We designed our systems from the start for live, interactive presentations. Our three user-friendly interface options enable you to teach from anywhere in the dome. They are so intuitive you can even let audience members drive!

Magical Remote Control

Universal Console

interface for iPad or PC:
includes Augmented Lessons
to start teaching right away.

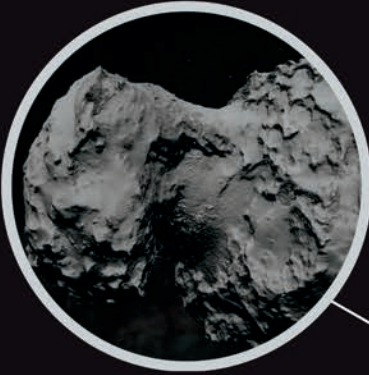

Wireless Gamepad

for natural exploration
of the universe

Nightshade® G3

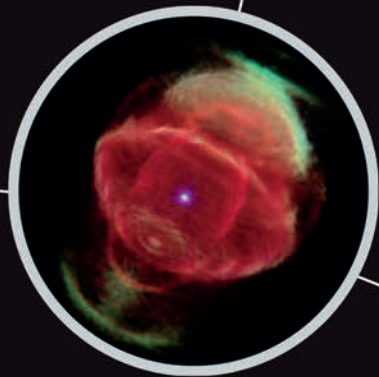

Simulation and visualization software

developed by Digitalis for teaching and exploring astronomy, Earth science, and related topics

Stunning realism

brings your immersive presentations to life.

Present on any subject

and easily integrate live, scripted, and multimedia functions!

Fixed Systems

Fixed dome systems offer an enormous range of features and outstanding quality at affordable prices. We offer single and multi-projector options. Our Æthos™ models are available in cove or center mount configurations.

Multiple options

at different resolutions, brightnesses, and price points

Full range

of related products and services such as dome cleaning/ installation, theater control, and audio systems

Low operating costs

with laser-phosphor projection and automated camera-based multi-projector alignment

Digitarium Portable Systems

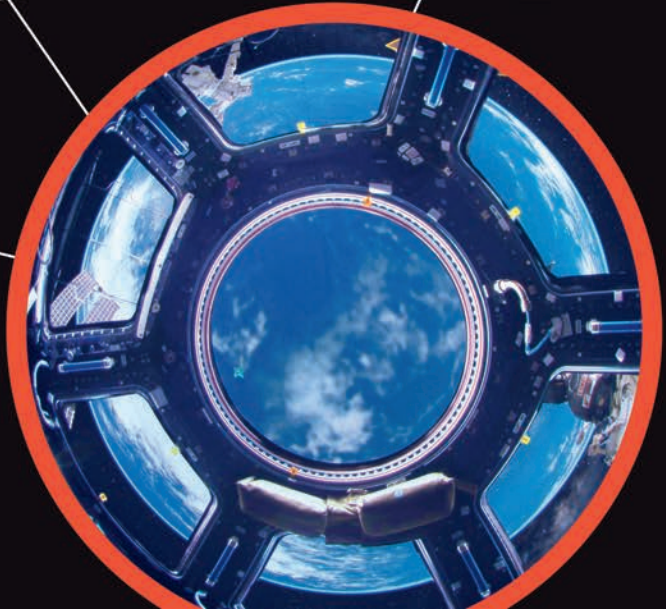

Set up a full-featured planetarium in about 10 minutes virtually anywhere. Portability and ease of use enable you to share one system and its cost across a school district or with other area groups. Choose from a lower cost Basic option or much more powerful Professional software package.

High Resolution
at affordable prices

**Laser-Phosphor
Projection!**

Digitalis Inflatable Domes

○ Digitalis inflatable domes are the professional solution for an easily portable, high quality dome projection screen.

Designed
and assembled
in the US by
